
Adding an Exchange Account to GMail

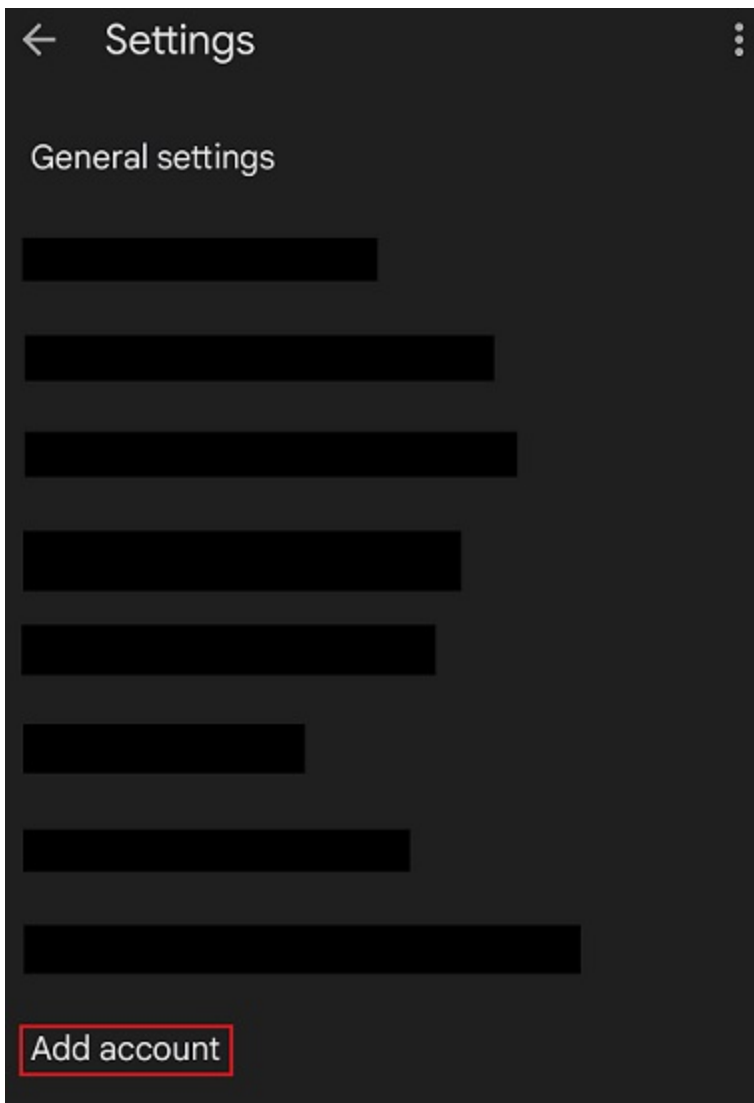

The following contains a short manual on how to add your exchange account to the GMail App.

Settings

To add your Exchange Account to the GMail app, open the app and then go to **Settings**.

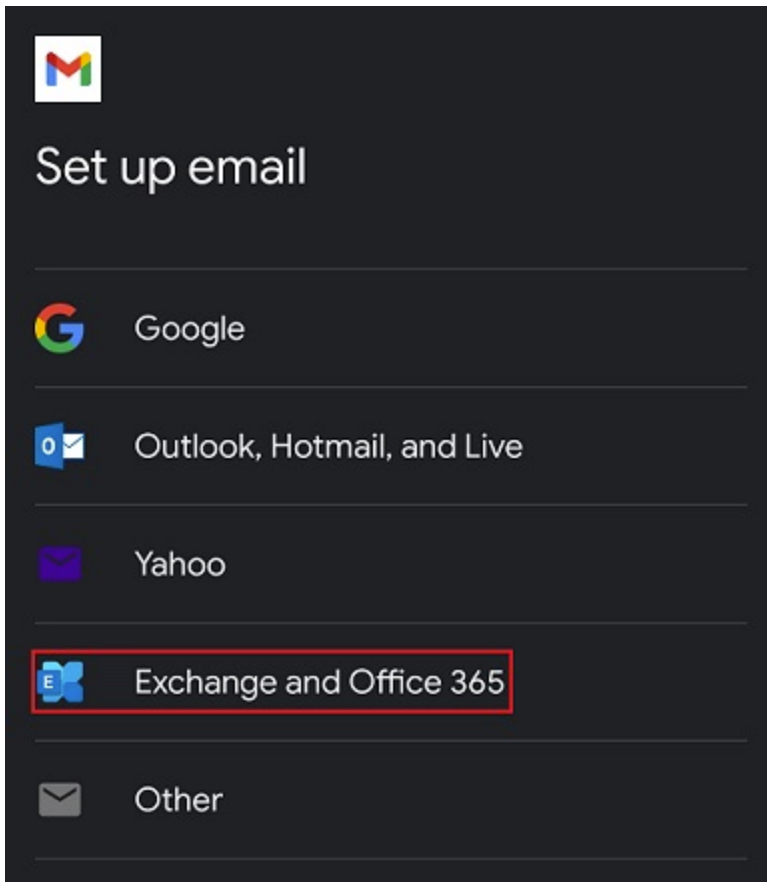

Here, select the option „**Add account**“.

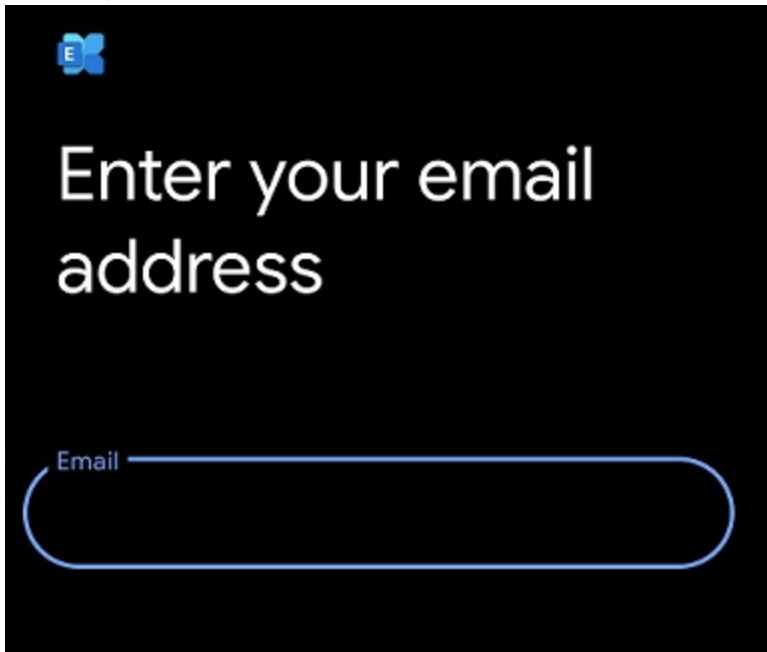

Setup

Now, select the option „Exchange and Office 365“.

Provide your e-mail address and select „**Manual setup**“, to configure your account.

Next, provide your password. Additionally, provide your **username** [+@uni-siegen.de](#) (e.g. [g123456@uni-siegen.de](#)) and type in „[mail.uni-siegen.de](#) ☑ “ for the Server.

Email setup
